Initial Student Tasks

• Create a ‘python’ directory in your mt227 directory.
  – This is where we are going to store all of our python notebooks

• Create a ‘python’ directory in your WWW directory.
  – This will allows us to assign a URL to your notebooks once they are completed that can be used for handing in assignments and grading.
Planned Approach

• I will present on some important material, but my approach is going to be:
  – Post informative lectures python syntax on course website.
  – Lecture using examples within IPython notebook, sharing those examples with students.
  – Base homework assignments off modifications of my shared code.
