

Table: 5-day running sum statistics for morb (centroid-lon), organized by model.

Statistic	C-PRISM	RC-GFDL	RS-GFDL	RC-MPI	RS-MPI	WC-MPI	WS-MPI	WC-GFDL	WS-GFDL
Normality p	< 0.01*	< 0.01*	< 0.01*	< 0.01*	< 0.01*	< 0.01*	< 0.01*	< 0.01*	< 0.01*
Welch p		0.73	< 0.01*	0.79	< 0.01*	< 0.01*	0.19	< 0.01*	0.48
Tukey p		0.72	< 0.01*	0.79	< 0.01*	< 0.01*	0.19	< 0.01*	0.48
WMV p		0.033*	< 0.01*	0.073	< 0.01*	< 0.01*	0.18	< 0.01*	0.36

¹ Time periods: (C) 1981 - 2001 and (S) 2079 - 2099.

² Volume: 4.

³ Threshold: 150 mm.

⁴ All tests significant at $\alpha = 0.05$.

⁵ Anderson-Darling Normality Test. * denotes the distribution is not a normal distribution.

⁶ Welch Two-Sample T-Test. * denotes the paired sample distribution means are significantly different.

⁷ Tukey Honestly Significant Difference Test. * denotes the paired sample distribution means are significantly different.

⁸ Wilcoxon Mann-Whitney U Test. * denotes the sample distributions are significantly different.
