

Table: 5-day running sum statistics for strname (strvname), organized by model.

Statistic	PRISM	RC-GFDL
Normality p	< 0.01*	< 0.01*
Welch p		< 0.01*
Tukey p		< 0.01*
WMV p		< 0.01*

¹ Time periods: strstime - stretime.

² Volume: strparv1.

³ Threshold: strtname mm.

⁴ All tests significant at $\alpha = 0.05$.

⁵ Anderson-Darling Normality Test. * denotes the distribution is not a normal distribution.

⁶ Welch Two-Sample T-Test. * denotes the paired sample distribution means are significantly different.

⁷ Tukey Honestly Significant Difference Test. * denotes the paired sample distribution means are significantly different.

⁸ Wilcoxon Mann-Whitney U Test. * denotes the sample distributions are significantly different.
